Our lab is operated by trained professionals who conduct continuous testing to uphold the highest quality standards expected in the market.

All incoming paddy lots are first tested for moisture content, foreign matter, and grain maturity before processing. During and after milling, samples are again checked for whiteness, broken percentage, grain length, and aroma to confirm that the final rice meets our strict quality benchmarks.

The laboratory is equipped with modern instruments for moisture testing, purity grading, density checking, and sample analysis, enabling precise monitoring and quality control.

By maintaining this advanced testing setup, we ensure that every grain of rice delivered from our unit reflects the natural purity and authentic taste of Bundelkhand's produce.
